## PHOTOGRAPHER & STUDENT PROGRAMMER

### About Me

Hi! I am a photographer/videographer. In addition to being a photographer/videographer. I am also a student programmer, new to the programming world, but eager to learn and develop my skills. With 3 years of experience in photography and a strong desire to learn more about programming. I have recently started taking programming classes and am currently enrolled at STI Calbayog in the IT (MAWD) strand I am excited to explore more in this field. My goal is to combine my photography and programming skills to create interactive and engaging experiences for my audience. I am always on the lookout for new opportunities and challenges to grow my skills and knowledge in both fields.
